Index	Item	Description
1	Modem connector or IEEE 1394	<ul style="list-style-type: none">• If your computer has a modem connector, connect your computer to a telephone line with the modem connector.• If your computer has an IEEE 1394 connector, which is used for connecting devices that are compatible with the IEEE 1394 interface, such as digital video cameras and external hard disk drives. <p>Note: Depending on your model, your computer might have neither modem connector nor IEEE 1394 connector.</p>
		<p>The Always On Universal Serial Bus connector is used for connecting devices compatible with a USB interface, such as a printer or a digital camera.</p> <p>By default, even if your computer is in sleep (standby) mode, the Always On USB connector still enables you to charge some devices, such as</p>

2	Always on USB connector	<p>On USB connector still enables you to charge some devices, such as iPod®, iPhone, and BlackBerry® smartphones, by attaching the devices to the connector.</p> <p>However, with the ac power adapter attached, if you want to charge these devices when your computer is in hibernation mode or powered off, you will need to open the Power Manager program and configure corresponding settings to enable the Always On USB connector function. For details about how to enable the Always On USB connector function, refer to the on-line help of the Power Manager program.</p> <p>Note: Your computer is compatible with USB 1.1 or USB 2.0.</p>
3	Power jack	<p>The ac power adapter cable connects to the computer power jack to provide power to the computer and charge the battery.</p>
4	Fan louvers (rear)	<p>The internal fan and louvers enable air to circulate in the computer and cool the central processor.</p> <p>Note: To avoid impeding airflow, do not place any obstacle in front of the fan.</p>
